<p>John Ward</p> <p>Aeroflex USA</p>	<p>Insulation for VRF/VRV HVAC Systems</p>
--	---

This month's chapter program will include a presentation from John Ward titled "Insulation for VRF/VRV HVAC Systems".

9 out of 10 mechanical engineers are probably not informed on what type of insulation and thermal requirements are needed on a VRF/VRV equipment system.

This presentation by John Ward of Aeroflex is to give you some idea in selecting the proper insulation materials and thermal requirements.

John Ward is Vice-President of Sales for Aeroflex USA, Inc. located in Sweetwater, TN.

Aeroflex technical personnel have served on various ASHRAE and ASTM committees and subcommittees and the National Insulation Association technical committee.

Mr. Ward has been associated with the building mechanical systems industry since 1980, holding various roles in the sales and marketing of fiberglass and elastomeric insulation product lines. During that time, he has served in several positions requiring in-depth work with business and product development, system design, specification standards, and codes. He can be reached at jward@aeroflexusa.com.

Professional Development Certificates (1 hour) will be provided at the Lunch meeting. The lunch meeting should conclude by 1 p.m.

2018-19 Chapter Programs

Good programs are what make the Chapter meetings a success. Last year your participation (attendance) was great. It is directly attributable to the quality of programs. Input is continually needed from everyone (both members and non-members) for topics (and potential presenters) that are of interest. Efforts will be made to address all needs (residential, commercial, nuclear, renewable, etc.), so do not be ashamed to ask.

Contact [Kay Thrasher](#) or any current Board member with suggestions.
