This month's chapter program will give us the opportunity to learn more about Siphonic Roof Drains from MIFAB Inc's Ryan Moore. MIFAB Inc is a manufacturing firm serving commercial, residential and industrial piping and drainage markets.

Mr. Moore is from Nashville, TN. He is a veteran of Desert Storm in the United States Navy. Mr. Moore holds a Bachelor of Science degree from the University of Tennessee. He has 21 years of experience in the mechanical and plumbing industry. He worked as an estimator, account manager, and project manager for The Comfort Group in Nashville. He worked as a district manager in the Southeast US for Victaulic Company. He has also worked in the Eastern US for NIBCO Inc as a commercial products manager. Mr. Moore is currently with MIFAB covering the Southeast US as a regional director.

Mr. Moore will be giving an overview of the benefits of designing with siphonic rainwater systems versus traditional gravity systems. He will also discuss the type of buildings that are suitable for the siphonic roof drainage system and the limitations of the system. He will discuss the different components and design process of laying out a siphonic system.

Professional Development Certificates (1 hour) will be provided at the Lunch meeting. The lunch meeting should conclude by 1 p.m.

2019-20 Chapter Programs

Good programs are what make the Chapter meetings a success. Last year your participation (attendance) was great. It is directly attributable to the quality of programs. Input is continually needed from everyone (both members and non-members) for topics (and potential presenters) that are of interest. Efforts will be made to address all needs (residential, commercial, nuclear, renewable, etc.), so do not be ashamed to ask.

Contact [Kay Thrasher](#) or any current Board member with suggestions.
